CERTIFIED

RUBBER BASE ENAMELIZED LIQUID CEMENT PAINT

**Protective Durable Concrete Floor Covering
"That Wears Like Stone"**

For Floors and walls in service stations, showrooms, factories, shower rooms, recreation room floors, laboratories, hospitals, etc. where alkali, oil, dampness, acids, and other destructive factors are a problem—Dries in an amazingly short time—depending on temperature and moisture conditions—Dries hard overnight—Easy to apply—Flows out smoothly to a glossy, glowing scuffproof stone-like surface . . .

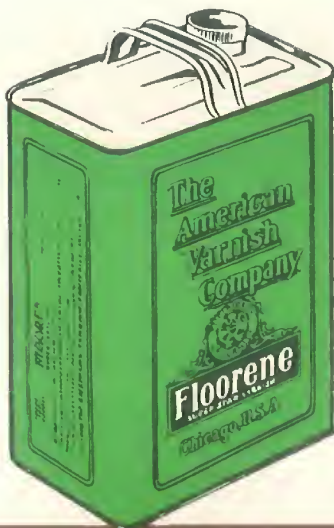

RESISTS WEAR — MOISTURE PROOF

AMERICAN Floorene VARNISH

for

**FLOORS — FURNITURE
WOODWORK**

A PROTECTIVE coating with a lasting and durable glowing finish.

MARPROOF SCRATCHPROOF

Floorene Varnish—has stood the test for sixty-five years and has been used in the most exclusive homes the world over. It imparts a high lasting luster to your floors and woodwork. It is absolutely MARPROOF—SCRATCHPROOF. Withstands repeated washings with soap and water. Dries hard with a highly glowing, brilliant beauty.

Floorene can be used wherever you want a lasting protective coating. For a glowing durable finish, use Floorene Varnish.

Beautify and Preserve **YOUR LINOLEUM**

American's Water White No. 101

A Crystal-Clear Coating for Linoleum

Here is a linoleum coating so transparent that it permits the most delicate patterns and colors to show through undimmed . . . yet so durable that neither extreme wear nor repeated washings can harm the beauty. AMERICAN'S Water White No. 101 offers your customers the utmost in an easy-to-use, long-lasting coating that extends the life and beauty of linoleums and composition floor coverings.

AMERICAN'S Water White No. 101 flows smoothly, seeks its own level and dries in one hour. Once applied, waxing becomes unnecessary and cleaning is made simple and easy. No need to worry about discoloration. Water White will never yellow even the lightest pattern.

PAINT CATALOG

IMPORTANT

Departing from our usual method of quoting Net Prices to the Wholesale Trade, we now have two prices shown in the Old-Stand-By Paint Catalog—THE TOP PRICE IS THE RETAIL LIST OF THE ITEM AND THE OTHER IS YOUR NET COST, less the usual quantity schedule and regular cash discount.

It is our sincere wish that this new arrangement will help you in quoting prices to your customer and also in determining your net cost.

LOOKS BETTER—

GOES FARTHER—

ECONOMICAL—

It Flows Smoothly and Easily From the
Brush, without Leaving Brush Marks

COVERS 25% MORE SURFACE
360 TO 400 SQUARE FEET, TWO COATS

Imperial House Paint—"two coat system" consists of a primer coat and a finish coat.

The primer coat—Imperial House Paint Primer—has remarkable hiding power, plus penetration which forms a perfect bond, seals the surface and produces a non-absorbent film eliminating all possibilities of your finish coat flaking, chalking, fading and peeling. Dries to an absolute Flat Finish giving that extra tooth necessary for that two coat job on old or new work. Imperial House Paint—finish coat—is a 100% pure outside paint, not affected by heat or cold, does not fade or chalk off, but retains its freshness for years, insuring the perfect "two-coat" system.

One coat Imperial House Paint Primer and one coat of Imperial House Paint provides a finished job comparable to any ordinary 3 coat Lead and oil job.

IT COSTS NO MORE TO BUY THE BEST!

OGDEN HOUSE PAINT

Pure Linseed Oil—For Interior
and Exterior Use

OGDEN HOUSE PAINT is good paint because it contains, in correct balance, the right amount of lead and zinc to give body, hiding power and wear. We use only pure raw or pure refined linseed oil, and a small amount of the best drier. Therefore, the pigment content of this paint insures maximum protection—the linseed oil and driers give life and wear to it.

One gallon covers approximately 300 square feet, two coats.

Dutch Boy Blended House Paint

3 DIFFERENT BLENDS

FOR 3 DIFFERENT JOBS . . .

Here is an entirely new kind of "Dutch Boy" House Paint . . . Blended just right to stay bright. Blended of exactly the right ingredients, White Lead, Titanium, and Zinc, for lasting protection on any outside surface.

1. **Blended for Self Cleaning White That Stays White:** Bright White covers well and gives a dazzling white exterior finish. Permits rain to wash away dirt.

2. **Blended Tints** retain their colors because they are blended to assure lasting color and uniformity.

3. **Blended Trim Colors**, for sash and trim work which stay bright and colorful because they are blended to hold their gloss—blended for color permanence.

Imperial House Paint Primer

The Finest Foundation for a Two Coat Job

Imperial House Paint Primer is made from the finest Lead and Titanium pigment combined with treated oils and dries to an absolute Flat Finish giving that extra "tooth" necessary for that two coat job and full assurance and protection against the usual paint failures on old and new work.

One coat of Imperial House Paint Primer and one coat of Imperial House Paint (see page 2) provides a finished job comparable to any ordinary 3 coat Lead and oil job.

Imperial House Paint Primer has remarkable hiding power, plus penetration, which forms a perfect bond, seals the surface and produces a non absorbent film eliminating all possibilities of your finish coat flaking, chalking, checking, fading and peeling.

Verde-Vogue Trim Colors

Permanent Colors

For outside body and trim painting. Especially prepared to meet an ever-increasing demand of master painters for a superior quality distinctive line of trim and body shades for outside use.

Eliminates the necessity of tinting and mixing to obtain the proper shade of Green. Colors are of

striking beauty and individuality, ready for the brush.

VERDE-VOGUE TRIM COLORS will cover approximately three hundred to four hundred square feet to the gallon, two coats, over any fair surface, depending on the color. The lightest greens lack the high covering capacity of the deeper colors; since they contain a high percentage of the rare **Oxide Green Pigments**, and some coverage is necessarily sacrificed to permanency.

Lead-Zinc-Titanium Paste Paint

100% Pure Paste Lead and Zinc Titanium

The Five-Year Paint

There is absolutely no secret about our paste lead-zinc-titanium. It is exactly as you would make it yourself. Contains strictly pure white lead, pure zinc oxide and titanium pigment. The liquid is pure raw linseed oil, with just the right amount of drier and turpentine. Add oil when priming new work or turpentine on old work. **Reduces 1 gallon of lead-zinc-titanium to 1 gallon of thinners.**

Dutch Boy

Pure White Lead Paint

For those who want their white lead in ready-to-spread form the makers of Dutch Boy materials offer this new product. As the name implies, this paint is **all white lead**—no other pigment is added.

Ideal for Two-Coat Work. The market affords no better "two coat system" for painting both new and old outside wood. The Exterior Primer has the adhesion possessed only by pure white lead, it seals properly and has unusual hiding power. The Outside White anchors itself securely to the Primer, it goes on easily, levels out nicely and its gloss finish is well retained.

ENAMEL FINISH PAINT

Washable and Durable

Produces a High Gloss Finish . . for Modern Interiors

Covers Perfectly—Last Longer

Can be applied to plaster, cement, wood, wall-board or metal surfaces with pleasing results. Its color tones are rich and lasting, and are not affected by steam or frequent washings.

It is easy to apply and spreads without difficulty under the brush. It has an unusual covering capacity, and will average 550 to 600 square feet to the gallon, one coat.

Master Painters use Sappanos Enamel Finish because of its established quality and economical advantages. Absolute satisfaction is assured, and we especially recommend it for kitchens and bathrooms.

Because of its proven durability and sanitary qualities, this finish is widely used in hospitals, dairies, bakeries, laboratories, offices, factories and public buildings. In these establishments, careful buyers select only tested materials of maximum covering capacity and wearing qualities.

Kolor-tone Semi-Gloss Enamel

DURABLE -- WASHABLE

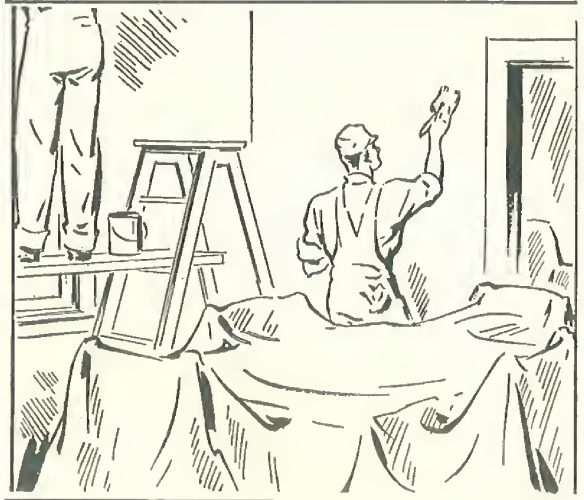

A Semi-Gloss Enamel Finish for Interior Walls and Woodwork

This product is a dull semi-gloss finish that produces beauty, protection and hard wear. It is especially adapted for use on walls, woodwork, ceilings, kitchens, pantries, sun-porches, bathrooms, furniture, etc.

It is made in eight beautiful and popular shades, that afford a fine variety for harmonious decoration. This eggshell finish has excellent hiding qualities, is easy to brush, and produces a hard wearing, dull finish. It can be washed with mild soap and warm water without injury to the finish.

This product works so easily and spreads so well that it reduces painting effort to a minimum.

Three Hundred Satin Finish Eggshell Enamel

"The One Coat Enamel"
For Walls—Ceilings—Woodwork

WHITE ONLY

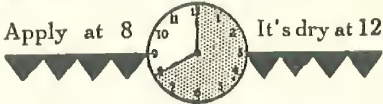

Here is a soft Satin-Eggshell finish enamel for interior walls, ceilings, or woodwork. For home, office or institution this enamel is ideal. Finger marks, smudges, and grease spots are easily washed from its nonporous satin like surface with ordinary soap and water, which is important in kitchens, bathrooms, hallways, nursery, and laundry. For wood-

work, too, satin finish is practical and beautiful. Its rich satin finish brings new loveliness to any interior surface. The balanced sheen, between gloss and flat, minimizes reflection glare, making it an excellent satin finish.

Kolor-tone

The Wonder Enamel

Economical to use because
ONE COAT COVERS

KOLOR TONE, the Wonder Enamel, is truly the outstanding practical finish of the day. You can coat or re-coat any object, inside or outside, and have the use of it the same day, where it formerly required from three to four days. The first brush full applied, will convince you of the ease with which it smoothly and solidly covers old shabby surfaces in one coat.

Easy Brushing—Durable Colors

NO BRUSH MARKS

Experience is no longer necessary to produce that porcelain type finish, so much admired. By employing KOLOR TONE, The Wonder Enamel, with ordinary care, you are assured of expert results, since it levels itself into a smooth, even, glossy, hard film, without showing any brush marks whatever. It is a finish which duplicates a factory job, or work turned out by an expert.

LARCOLOID 1-HOUR DRY ENAMEL

SYNTHETIC FINISHES  SPRAY OR BRUSH

RESISTS ACID AND ALKALI

Larcoloid dries in one hour to a hard, tough surface that has remarkable weather-resisting qualities as well as greater adhesion to bare metal. Larcoloid may be readily applied over any clean, dry surface without danger of raising undercoats.

FOR AUTOMOTIVE - SIGN AND
INDUSTRIAL USE

It may be applied by brush or spray method. Larcoloid may be thinned with Larcoloid Reducer, a special economical reducer for this purpose, or equally satisfactory results may be obtained by using pure turpentine.

Valspar Yacht Finishes

From the extensive Laboratories of Valentine & Company, Inc., makers of Valspar, comes these famous Valspar Yacht Finishes, long recognized as supreme in the marine field. Each Valspar product is formulated in exacting standards and manufactured with equipment that represents the latest improvements in paint and varnish making.

Not only does the unmerciful eye of the laboratory prove the accuracy and uniformity of Valspar Yacht Finishes, but Valentine and Company, Inc. maintain their own test fleet, where these same finishes are undergoing all year round what most boats are expected to stand for only a season.

Imperial Enamel Undercoater

Maximum Hiding . . . Easy Sanding . . . Free Flowing

This is a non-porous, solid covering coat for all surfaces to which enamel is applied. It is a perfect flat undercoat which insures a high class enamel job. It is ground to a fine texture and requires but little sanding to produce a good ground for building up enamels. Composed of high quality ingredients and is very dense. Works easily under the brush and flows out to a uniform thickness. It may be applied on any surface—brick, stone, wood, metal, cement, concrete, plaster, etc. It is very easy to apply and is adapted to the highest grade enamel finishes. If reduction is necessary, use pure turpentine. A gallon covers 500 square feet, one coat.

PRESERV-A-TONE Protective Wall Coating

PRESERV-A-TONE IS EASILY APPLIED with a clean paint or calcimine brush . . . and PRESERV-A-TONE cannot pull, peel, crack, or crawl . . . even when applied over freshly dried paints. PRESERV-A-TONE produces a beautiful, flat finish (even when used over high-gloss paints and enamels) which softens and subdues the glare of artificial lighting. PRESERV-A-TONE should be used over all painted wall surfaces, guaranteed washable wallpapers, and is indispensable over canvassed walls, glazed or antiqued finishes.

Martin-Senour No. 2633 Primer-Sealer A First Coater for Plaster

Pigmented Wall Sealer

An ideal first coater for on either new or old plaster wall, wallboard and other porous surfaces. Seals the surface and covers exceedingly well. Can be used on fairly fresh and damp walls with satisfaction. It works easily, brushes freely, and dries with a tough, impervious, elastic film. Can be tinted with oil colors. No. 2633 Pigmented Wall Sealer

reduces the work of painting by making the finish paint spread more easily and more evenly. Paint applied to surfaces prepared with a foundation coat of No. 2633 Pigmented Wall Sealer adheres more firmly, making for longer wear.

Kolor-tone FLAT WALL PAINT

INK PROOF—IODINE PROOF—STAIN PROOF

SUPER QUALITY WASHABLE FLAT WALL PAINT FOR INTERIOR DECORATION WON'T CRACK, CHIP OR BLISTER

AN UNUSUALLY high quality, washable, flat oil wall finish for interior decoration of homes, public buildings, hospitals, schools, churches, theatres and offices. Produces a subdued mellow effect, restful to the eye. KOLOR-TONE FLAT is practical, easy to apply, works freely under the brush, dries quickly, sets slowly, yet shows no trace of brush marks. It may be used on plaster, wood, cement, metal burlap wallboard, paper, and in fact, any similar surfaces. It's the proper finish for ceiling and walls in the living room dining room, bedrooms, library and halls. The easy-to-apply-and-keep-clean feature of KOLOR-TONE FLAT define economy in its broadest sense.

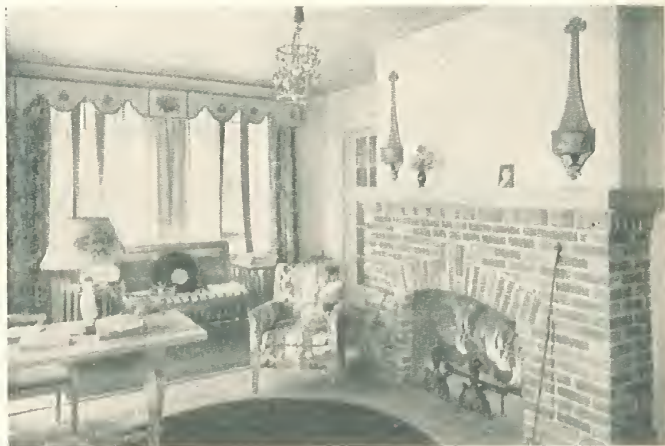

COVERING CAPACITY

One gallon of KOLOR-TONE Flat Wall Paint will cover approximately 550 to 600 square feet one coat, depending upon the condition of the surface over which it is applied. When used over smooth plastered walls one gallon will cover between 650 to 800 square feet one coat.

DEEPTONE FLAT COLORS

WASHABLE—MODERN FRESCO COLORS

Old Stand By Deep Tone Flat Colors are designed to meet the needs of the interior decorator, master painter and architect for interior decorative schemes which require deep colors. From a practical standpoint it is almost impossible to make the deep colors with oil colors. With Old Stand By Deep Tone Flat Colors many deep shades can be easily and quickly made. Old Stand By Deep Tone Flat Colors can be used either straight or intermixed with

other deep tone colors, or for tinting any flat white or sheen finish paint. Apply Old Stand By Deep Tone Flat Colors like an ordinary flat paint. When a two-coat job is being done the first coat should be Old Stand By Pigmented Wall Sealer mixed half and half with the deep tone color which is to be used for the finished job.

Mix-Ex Flat 2286 (Interior)

Mix-Ex is a semi-transparent pigmented carrying agent for Nu-Hue Liquid Colors. Its semi-transparent nature does not change the color tone and when used does not reduce the opacity of the color. Mixes quickly with Nu-Hue colors, does not injure the permanency. Eliminates burnishing—improves washability. Produces beautiful eggshell flat finish.

Should be used in the proportion of 2 parts Mix-Ex and 3 parts of Nu-Hue Liquid Colors. Do not thin, use as it comes in the can.

THE COLOR COORDINATOR SYSTEM—Specifically Designed by Martin-Senour to Solve Every Color Mixing Problem for the Painter and Decorator

Nu-Hue Liquid Colors

FOR TINTING, BLENDING, AND DECORATING

Absolutely different—permit results never before possible! The blending and tinting colors so much in demand for modern decorative schemes . . . colors with high tinting strength, quick dispersion true tone, and smooth texture!

ONLY 16 COLORS—Sixteen basic colors offer unlimited tinting possibilities. No seldom-used colors. No waste—packed in patented easy-pour cans.

UNBELIEVABLY CLEAR—Gives clear tints and shades never possible before. Let-downs are clear and sharp—no trace of muddy off-casts.

SMOOTH BLENDING—No color correction necessary. Rapid mixing. Quick and complete dispersion. No tendency toward "lumping" or streaking.

EXTRA STRENGTH—Basic colors are very strong. Economical to use. A little goes a long way.

NON-FADING—Colors usually regarded as quick-fading retain their brilliance for NU-HUE LIQUID COLORS are sunfast! Here's the permanence you've always wanted!

All 497 Colors are shown on the COLOR COORDINATOR CHARTS, arranged as to chroma and hue, separated as to value level. Each Coordinator Chart also carries the ratio table for let-downs with white at any desired level. Spiral-bound into an attractive 12"x12" book, this set of COLOR COORDINATOR CHARTS is the essential color selection and color mixing "key" to the Martin-Senour COLOR COORDINATOR SYSTEM.

Color Coordinator Charts, Each.....**7.00**

The Color Coordinator Directory

shows all 497 colors on generous 3"x5" cards . . . actually painted samples for the necessary "large-area" view. The reverse side of each Directory card gives the individual color identification which serves both as the color name and the mixing formula.

This handsome, ring-bound Directory is an efficient and attractive aid to color selection. Each color is vividly displayed at 7 different value levels, grouped in steady, even progression. As a sales and professional tool, the COLOR COORDINATOR DIRECTORY is a brilliant and accurate representation of this revolutionary mixing system.

Color Coordinator Directory, Each.....**17.00**

MARTIN-SENOUR Nu-Hue Custom

FINISHES AND COLORS

The first and only complete color system to offer 2476 colors to match or harmonize with your draperies, carpet or furnishings. Match samples or decide the correct color scheme . . . and get EXACTLY the color you select when the paint dries! A complete and accurate color service.

Nu-Hue Custom Color brings new horizons in color selection and accuracy for decorators, architects and contractors. Never before has such complete color coverage been achieved for domestic and commercial use.

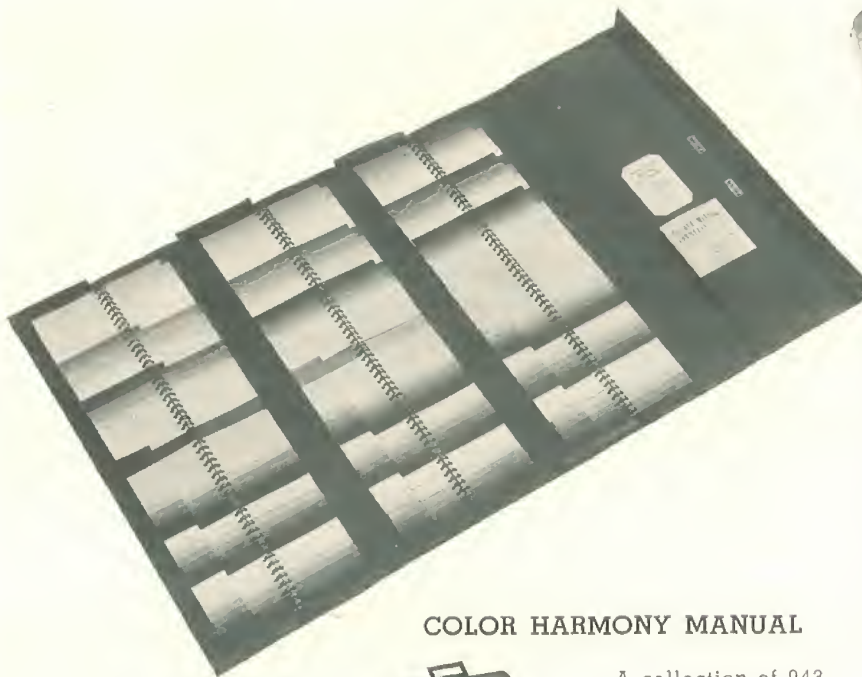

Of finest-ground organic pigments, Nu-Hue paints insure easier brushability, maximum coverage and better "hide" . . . give a washable, fade-proof surface of enduring protection and beauty.

OUTSIDE *Luminall* EXTERIOR MASONRY PAINT

BRUSH or SPRAY
For CONCRETE, BRICK OR
STUCCO. APPLY ON EITHER
BARE OR PAINTED SURFACES

OUTSIDE Luminall is being used on the exterior of all types of buildings from big estates like the one pictured, to modest bungalows. And of course on business structures of every kind and size.

The reason for OUTSIDE Luminall's great popularity: A splendid paint—better looking jobs—better results—easier to handle—such as one coat coverage in most cases—no wetting down walls—ideal bond and wearing qualities.

Send for literature showing use of

OUTSIDE Luminall on

STORES — RESIDENCES

HOTELS — CHURCHES

PUBLIC BUILDINGS — FACTORIES

FILLING STATIONS

ETC.

Exterior of 1601 N. Milwaukee Ave. Present location of Fairfield Savings and Loan Ass'n, formerly the Noel State Bank Building. Photo shows "before" and "after" application of "Outside" Luminall.—OTTO DEUTSCH, Chicago, Painting Contractor.

ULTRA *Luminall*

- The new oil-type paint that thins with water.
- One coat covers—Dries in 40 minutes.
- No priming necessary. It's Washable and easy to apply.
- Paint over Wallpaper—The makers of Ultra Luminall were the first to make a good "Wallpaper Paint" and nationally advertise its use. Ultra Luminall is perfect "over Wallpaper", old or new plaster, all kinds of wall-board, painted or unpainted surfaces, concrete, brick, etc.

Ultra Luminall is a new idea in paint, containing the magic-like alkyd resins. It's an exciting experience to use this paint that works so easily—costs so little—looks so attractive and washes perfectly.

Ultra Laminall goes on with marvelous ease. Use as wide a brush as you have, or a Luminall Wall Roller for applying.

COMES IN WHITE, IVORY, PEACH, SEA GREEN, BUFF, SUNLIGHT YELLOW, POWDER BLUE, CREAM, TURQUOISE, ROSE, SAGE GREEN, TWILIGHT GRAY, QUARTZ PINK.

ULTRA LUMINALL comes in paste form, and makes 1½ gallons of ready-to-use paint, which is enough for the average room. The coverage capacity of one gallon of Ultra Luminall is from 250 to 750 square feet, depending on the type of surface being painted.

SATIN LUMINALL SYNTHETIC RUBBER BASE PAINT NON-INFLAMMABLE

Satin Luminall—The newest of paints that completely changes all concepts of what to expect from an interior flat wall finish. A synthetic rubber emulsion paint that thins with water and covers over 700 sq. ft. per gallon. One coat is usually sufficient, even over bare plaster or very porous wall board. Washable after a few days, and scrubbable within two to four weeks.

Thins with water approximately one quart to the gallon.

Made in 12 pastel colors and White, plus 8 beautiful style Deep Tones.

Muralo Zemco-Lite Cement Paint

The Perfect Stucco and Concrete Finish Waterproofs, beautifies and preserves in one operation.
Will not chip, crack, rub or peel off. Becomes an integral part of the surface to which applied.
Bonds perfectly with stucco, concrete, brick, hollow tile.
For use on all unpainted porous masonry surfaces.
Comes in powder form to be mixed with water.
Meets U. S. Treasury Department Specifications for cement water paint.

Use it on the exterior of your stucco home, on your basement walls, on cement walls, silos, cribs, swimming pools, stone and brick surfaces. Easy to apply with brush or spray. Muralo Cement Paint contains fine refined cement, and the color and the protection is cemented to the surface. Water repellent and weather resistant. Use on unpainted porous masonry surfaces only—and not on floors. Five pounds of powder when mixed with cold water will make one gallon of paint and will cover 100 square feet two coats. Two coats are necessary for a permanent job. Made in white and the following beautiful colors. Ask for a Color Card:

Machine and Tool Enamel

A glossy, attractive and durable finish on a piece of machinery will increase its salability far beyond the slight increase in the cost of finishing the machine. The cost of paint on an average machine is only a few cents. When using the best possible finish, the additional cost per machine is hardly noticeable. The difference in appearance is apparent at a glance and often makes sales easier.

"O-S-B" Machine and Tool Enamel is made of high grade durable varnish and permanent colors. It dries with a full gloss and is not injured by oil or water. Protects metal and wood from rust and deterioration. Dries in 4 hours, and has a fair degree of heat resistance. Suitable for engines, motors and machines of all kinds. Send for color card.

S-R-P Rust Proof Paint
Rust Inhibitive Protective Coating
For Metal Surfaces

Rust, the most destructive enemy of metals, can now be held in check by Sonneborn's S. R. P.—A SURE RUST PROTECTION FOR METAL SURFACES.

In S. R. P. the Sonneborn laboratories have developed a coating outstanding in its ability to inhibit rust. S. R. P. coatings ALLOY with the surface they protect. Whether the surface is new or old S.R.P. plates it with a tenacious film which is a barrier to corrosion.

Unusual coverage is secured with the S.R.P. coating without sacrifice of protective features. An average from 500 to 600 square feet per gallon, one coat, can be estimated for coverage.

S.R.P. requires no preparation before using; it is shipped ready for use and no expensive preparation of surface is necessary beyond the removal of loose scale.

Use S. R. P. No. 75 for Priming Surfaces

Use S. R. P. No. 87 for Finish Coat

Water-Shed

Heavy Fibred Roof Paint

(A Roof Cement in Liquid Form) Water-Shed Liquid Roof Cement is composed of refined asphalt, Oils and Long Fibre Asbestos. Is exceedingly effective in repairing leaky roofs, such as tar, gravel, concrete, slate, tile, tin, galvanized iron composition, felt or corrugated iron. Water-Shed may be applied with a large Paint Brush or Roofing Brush and will fill up small holes and leaks, thereby acting as a waterproofer. It is

equal in quality to Leak-Kon-Trol Paste Roof Cement but is in liquid form.

Leak-Kon-Trol

Paste Roof Cement

Leak-Kon-Trol Paste Roof Cement is a soft, elastic cement in paste form composed of Refined Asphalt and long Fibre Asbestos. It is adapted for use in repairing holes in metal roofs and gutters, as well as composition roofing. Leak-Kon-Trol is very elastic and adapts itself readily to the expansion and contraction of the surface to which it is applied, thereby preventing cracking. Leak-Kon-Trol should be applied with a trowel in a heavy coat and will form a permanent

repair that will oftentimes outlast the roof.

"O-S-B" Imperial Varnish Stain

Dries
Quickly!
Waterproof—
Transparent—
Stains and
Varnishes in
One Operation

"Old Stand By" Imperial Varnish Stain is manufactured for the purpose of staining and varnishing at one operation, and if instructions are carefully observed may be used on either new or painted surfaces with equal satisfaction. "Old Stand By" Imperial Varnish Stain is prepared by combining under a special process, hard drying varnish with non-fading color matter that will not hide the natural grain of the wood. Produces a mirror-like finish and is wear-resisting to a marked degree. Will not mar or turn white. Dries in four hours. A gallon covers 600 square feet, one coat.

Made in the following colors:

	Dark Oak	Light Oak	Walnut	Maple		
	Golden Oak	Red Mahogany

"O-S-B" Imperial Ground Color

THE BEST UNDERCOATING

For Varnish Stain and Graining
(Quick-Drying)

Imperial Ground Color is a good solid buff color made to dry flat and is most desirable for use as a first coater under varnish stains, graining compounds and colors. It produces a solid foundation coat of uniform color over dark and dingy surfaces, and is recommended for any painting work where a flat undercoating is required.

Linoleum Lacquer

"WATER WHITE"

This is a water clear lacquer that protects the most delicate linoleums. It dries slowly enough so that it brushes without pull. An hour between coats is enough for a good job. You'll find that this product protects the surface of linoleum adding years to the wear it will give. It won't discolor the most delicately tinted linoleums.

Bleaches — Beautifies — Brightens "THE EFFECTIVE WOOD BLEACH"

BLANCHIT — is a wood bleach consisting of three chemical solutions, No. 1 and No. 2, and stain remover which can be quickly and easily applied to any natural wood. Blanchit completely bleaches out all dullness, drabness and gloom, giving you the light, sparkling, modernized effect you want—and at the same time preserving the beauty of the natural wood grain in a lovely new delicacy of tone. Blanchit "brings out" beauties in old wood that you never suspected were there! After No. 1 Solution Blanchit and No. 2 Solution Blanchit have been used as directed allow work to dry. Apply Mahogany Stain Remover with separate brush or swab.

Weather-Proof ALUMINUM PAINT

Made with Alcoa Albron Aluminum Paste

In Double-Compartment Cans

DIFFERS from ordinary aluminum paints because it is made and recommended for all surfaces, exterior and interior. Is specially recommended for priming wood surface to economically correct bleeding, scaling and other common paint failures, also to assure maximum protection in two-coat work. Is superior to ordinary aluminum paints to brilliancy and smoothness of finish, application, spreading permanency and durability. Supplied in compartment containers, the lower contains the aluminum in paste form and the upper the liquid. Covering capacity on metal, 600 to 700 square feet on porous surfaces, to the gallon.

Imperial Aluminum Paint

Ready Mixed

Ready for the Brush

Inside or Outside

Recommended for all metal surfaces, either indoors or out. May also be used with splendid results on masonry and wood surfaces.

Has the good qualities of a spar-type aluminum paint, plus added beauty and protection. The scientific blending of gilsonite and asphalt derivatives in this product gives it excep-

tional inhibitive advantages. Has excellent weathering and enduring qualities. A gallon covers about 600 square feet, one coat.

Aluminum in Paste Form

A newly discovered patented process of Aluminum Metal in paste form. It is in an extremely fine state of division, composed of infinitely smaller particles than the finest Aluminum flakes, thoroughly wet and uniformly dispersed in a petroleum product. This paste mixture is absolutely smooth and will mix readily with our Bronzing Liquids. It should not be confused with Bronze Powders, mechanically mixed with kerosene or a similar volatile liquid. It is practically mirror-like and gives greater reflectivity than the powder. Aluminum Paste is 100% opaque and gives greater resistance to moisture and corrosion. The surface being smoother will not catch dirt and grime and will cover 25% more than powders.

STERLING 1000 SANDER

PORTABLE ELECTRIC

Portable Electric Sander

**FOR COARSE to FINISH
SANDING, RUBBING
or POLISHING**

Eliminates hand operations. Does the job three times faster—produces smooth, uniform surface. Used in metal, wood, and plastic working, in automotive, railroads, trailer, furniture, machinery, building, boat yards, aircraft plants, etc. Pad

moves in a $3/16$ " orbital motion at 50,000 cycles per minute.

Operates in horizontal, vertical or overhead positions. Sands flat or curved surfaces. Inboard construction permits work in close corners.

Sanding pad takes one-third of standard 9x11" sheet of abrasive paper in any grit desired. Quick, easy interchangeability of pads for various types of work. Pad $3\frac{3}{4} \times 7\frac{1}{4}$ inches.

1/5 h.p. Universal motor, AC-DC, 115 volts. Special filter safeguards motor against abrasive dust.

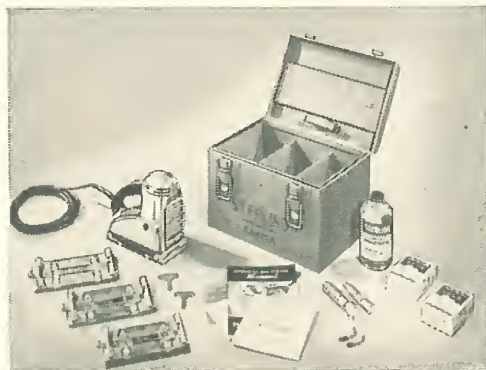

High-speed transmission has hardened gears with precision ground shafts and precision ball and needle bearings.

Packed 1 to a carton. Shipping weight, 11 pounds.

Paint Spraying Unit No. 326

1/4 H.P. Piston Type Compressor and Unit

A high quality, dependably, spraying outfit.

This unit is designed for small maintenance painting in factories, stores, warehouses, public buildings, schools, hotels, apartments and homes.

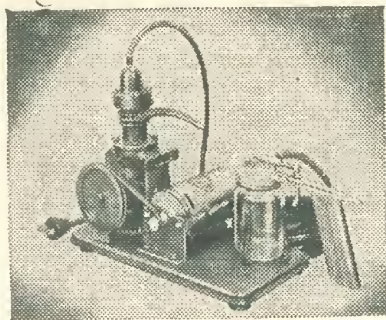

Comes complete with Compressor, Motor, Gun, Cup, 15 ft. length 3/16" hose with 1/4" connections, total weight only 46 lbs.

Compressor air pressure on the gun of over 30 lbs.

Motor is a 1/4 H.P. 110 Volt, 60 Cycle.

Complete Unit	List	70.40
	Net	63.35

Spray-Master Spray Unit

The SPRAY-MASTER portable spray outfit has been designed especially for home use. There is no limit to the spraying work that can be done with remarkable ease. No experience or skill is required. There is nothing complicated about it—any one can use it. It works equally well in spraying lacquers, enamels, insecticides, and mothproofing solutions. It makes a pleasure of painting screens, radiators, wicker and other furniture. 110-Volt, Universal AC-DC.

Complete Unit	List	24.95
	Net	20.95

Spray Gun Model DS

Convertible Type—Most Versatile Gun on Market for Light Production

Internal "break-up," pressure feed "bleeder" type. Capable of being converted to external mix type by a replaceable nozzle and tip assembly, CKD. Furnished with round, fan and angle spray nozzles. Oil and moisture filler in handle. CKD conversion kit extra.

Sprayit Model DS Spray Gun complete with 1 qt. aluminum container and 3 nozzles.

Gun, Complete	List	14.25

Adhesive Wall Paper Size

A size of extraordinary strength and adhesiveness, for use in preparing almost any kind of surface for the hanging of wall paper, burlap, pressed paper, Sanitas or other heavy wall coverings. It can be used with excellent results on painted or sand-finished walls or ceilings and on brick, glass or other surfaces and insures a perfect surface on which to hang any material. Adhesive detects the

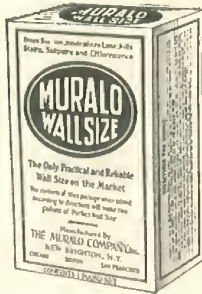

presence of hot spots and alkalies in the walls and gives warning in time to save trouble.

Muralo Wall Size

Mix with Hot or Cold Water

A safe and efficient wall size unequalled for preparing walls and ceilings for calimining, painting and paperhanging. Stops suction, neutralizes lime and kills stains. Provides a firm, elastic foundation for calimine, paint and wall paper. Guards against discoloration, cracking, checking and peeling of wall decorations. Especially adaptable for use on plaster, but can be used as well on wall board, canvas, burlap, and other interior surfaces. One pound makes 8 quarts of size.

LePages Cold Water Size

"The Paperhangers' Size"

An effective sizing compound for preparing wall and ceiling surfaces for calimining, painting and paperhanging. Stops suction, neutralizes lime, kills stains, and provides a firm, elastic foundation that insures the successful outcome of wall and ceiling decoration. Especially adaptable for use on plaster but can be used as well on wall board, canvas, burlap, and other interior surfaces. Mixes with Cold Water. One pound makes 6 quarts of size.

Venice Turpentine

Venice turpentine is highly recommended for strengthening ordinary flour paste, and will be found especially good in paste when hanging Sanitas, Waltex, Burlaps, etc. A tablespoon in a pail of paste and mixed thoroughly is sufficient.

	1 Gal. Each	Quart Each	Pint Each	1/2 Pint Each
List	4.20	1.20	.75	.45
Net	3.50	.95	.55	.35

Wheat Paste Perfect Working Paste

Absorbs far more water—makes more paste—hangs 50% more paper per pound—and hangs it better. Has a greater spreading capacity because one brushful actually covers more paper. Easy to mix—dissolves instantly when stirred into cold water, making a whole bucket of

paste in less than a minute.

Makes a clear, white paste, smooth as cream and entirely free from any grit or hard lumps. Has no disagreeable odor and does not sour. Spreads freely under the brush and slides easily on the wall. Sets slowly, allowing ample time for hanging without "freezing" at the edges and yet tacky and strong enough to hold canvas, and other heavy coatings. Does not stain, spot or smudge any material which is not so affected by clean water.

Tik Wheat Paste

The perfect paste for all wall coverings. Made from the best of wheat and selected materials which makes it even better than a straight wheat paste. Mixes easily with cold water, spreads freely and slides easily on wall. Does not sour, no disagreeable odor. Is smooth as cream and free from any grit or hard lumps. Does not separate on standing but becomes thicker. Sanitary—does not attract rats, mice or other vermin.

Decal Transfer Letters and Numbers

Gold Bronze Letters and Numbers with Black Outline

A COMPLETE SIGN MAKING SERVICE

Every sign a perfect job, precision made characters makes your sign job look better.

Weather-proof and permanent, these lustrous black lacquer and gold bronze letters are made of the finest materials, and give long lasting service. For added protection, a coat of bulletin spar varnish should be applied.

APPLICATION: First moisten surface of object, then put decal, face towards you, in desired position. Place thumb on letter, to hold it in position, as you pull backing sheet downward. Smooth out all wrinkles with damp cloth, working from center outwards.

One cipher (0) in 5" and 6" sizes figures only—single sets. Dollar symbol (\$) not included in 4", 5" and 6" sizes—figures. Lower case (e) not included in 4", 5" and 6" Letters or Figures.

STENCILS

Adjustable stencils of the interlocking type enable you to join letters or figures together quickly for immediate use. Any wording, name or address can be made, after which the letters can be distributed and used again. Indispensable for the shipping room, factory, stock and tool rooms. Stenciled lettering is far superior to hand work for clearness, uniformity and style. Merchants, farmers and manufacturers find these stencils ideal for all sign making and lettering purposes.

"O-S-B" Rubber Cement

ARTIST QUALITY

It's Clean . . .

It's Quick . . .

It Sticks . . .

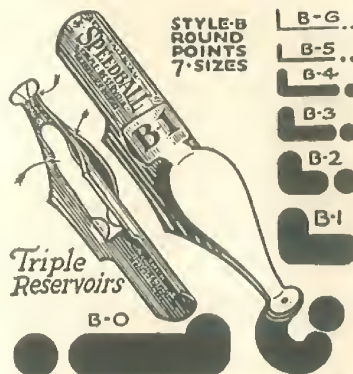

Used by artists, photographers, printers, engravers, office workers, for any kind of mounting, pasting or sticking . . . drawings, photographs, papers, even the flimsiest tissues or other flexible material. Lays Flat—Won't Wrinkle for permanent use . . . or permits to be easily removed when desired.

Crystal clear, transparent and waterproof—it will not discolor or soil the most valuable art work or documents. STAINLESS . . . just rub off the surplus with your fingers . . . does not soil paper or hands. Will not smear. EASY TO USE . . . spreads smoothly . . . quickly . . . leaves a clean, neat professional-looking surface.

Old Stand By "Tempera Show Card Writers Colors

—Permanent Colors
—Finely Ground

For making show cards, posters, signs, designs, theatrical displays and backgrounds for window displays. Old Stand By Colors are made from the best possible materials obtainable by specialists in color making. They are ground to a consistency which meets the most exacting demands of professional show card writers. They cover all surfaces easily and flow freely from the brush to the surface. In combination they produce clear tints as effective in color quality as original colors. All Colors dry with an opaque flat finish except Gloss Black, Silver and Gold, which dry with a gloss.

Muralo Art Colors

Beautiful bright colors. For deep effects, stenciling and general water color work. For use on ceilings and walls, art schools, interior decorating and fresco work.

The ideal colors where brilliant full-toned effects are essential. Used extensively by interior decorators, commercial artists, scene and sign painters, and for art work in schools. Work freely and smoothly under the brush, spread easily and dry quickly to a fine, smooth, velvety finish free from gloss or glare. Require only mixing with water to prepare them for

immediate use. White, Black and 13 positive colors. Ask for color card.

SCHMINCKE PERMANENT OIL COLORS FOR ARTISTS

In Studios Size Tubes

These colors are made up to specifications of contents as requested by the American Artists Professional League.

Pre-Tested Permanent Oil Colors are made to furnish the artists with colors of absolute permanency. Only genuine pigments, no substitutions, are used; and the composition of the color appears on every tube. All Pre-Tested colors are ground in pure (not chemically treated) cold pressed linseed oil, and wherever necessary a small amount, never exceeding 2%, of an absolutely neutral substance—Aluminum stearate—is added to secure the most complete suspension of the pigment in the oil. Aluminum stearate is NOT an adulterant.

RUBBERSET NYLON BRUSHES

the brush with the Permanent Wave

SEE THE DIFFERENCE! Outside bristles of conventional brush on right trail in paint film until worn down by use. Brand new Rubberset Nylon brush at left has patented chisel tip—no breaking-in needed!

IN A SCIENTIFIC WEAR TEST. Rubberset Nylon bristles lasted up to 5½ times as long as pre-war hog bristles. After one million strokes, hog bristle wear was 1½"—Nylon bristle wear was ⅓"!

5 BIG REASONS WHY YOU NEED THIS WONDER BRUSH:

1. PICKS UP AND DELIVERS MORE PAINT
(thanks to the permanent wave feature)
2. LASTS UP TO 5½ TIMES AS LONG AS THE BEST HOG BRISTLE.
(by independent laboratory tests)
3. NEEDS NO BREAKING IN
(thanks to the patented "chisel tip")
4. LAYS DOWN A SMOOTHER, MORE UNIFORM FILM
(exclusive grinding process gives a softer-tip)
5. CUTS A FINER LINE
(because Nylon filaments lie more evenly)

No. Brush	Width Size	Stock Out Length	Style	List Each	Net Each	Net Doz. Lots Each
1170	1½ inch	3 inch	Metal Bound Varnish Brush.....	2.50	1.85	1.65

1265	5 inch	5 inch	Metal Bound Wall Brush.....	12.35	9.20	8.25
1465	6 inch	3¾ inch	Metal Bound Floating Brush.....	12.35	9.20	8.25
1472	6 inch	4½ inch	Metal Bound Flattening Brush.....	14.10	10.45	9.40
9395	12 inch	2-Row	Wire Bound Smoothing Brush.....	5.25	3.90	3.50
9395	14 inch	2-Row	Wire Bound Smoothing Brush.....	5.95	4.35	3.95
1814	12 inch	3-Row	Wire Drawn Smoothing Brush.....	10.70	7.95	7.15
1814	14 inch	3-Row	Wire Draw Smoothing Brush.....	11.85	8.75	7.90
1815	12 inch	3-Row	Wire Drawn Smoother	5.15	3.85	3.45

→ WHY IT PICKS UP MORE. Curved hog bristle (A) provides space where paint is held. Ordinary nylon (B) picks up less paint. Rubberset Nylon (C) has "permanent wave." Scientific crimps provide maximum pick-up — more than hog bristle, much more than ordinary nylon.

HERE'S THE POINT: Filaments used in Rubberset Nylon (left) are tapered to fine, soft tip by the Rubber-set auto-grind process. Ordinary nylon filament with unground tip in photo at right. You can see at a glance why Rubberset Nylon lays such a smooth film! →

Painters' Overalls and Jackets

"SANFORIZED"

Overalls that stand the gaff — fit better — wear longer — ask the man who wears them. Made from standard weight closely woven high count overall drill. These garments wear like iron because extra long staple cotton used in weaving the fabric gives the cloth that increased strength which means more protection and longer life. Union made, bearing the union label, seams triple stitched to prevent ripping. Made extra large to fit comfortably without binding at crotch and under arms. Pockets strongly reinforced, high grade workmanship making them real, honest values.

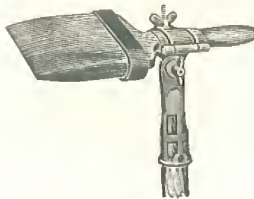

Note: Be sure to give waist and inside leg measure when ordering overalls.

Style No. 1 Overalls and Jackets

"Sanforized"—These are exceptionally well made garments. Extra heavy drill, large and roomy. For painters and paperhangers.

Safety Ladder Brace

MAKES OLD LADDERS LIKE NEW

Regardless of how old or loose your present ladders are now, these braces will make these old ladders tighter and more rigid than when new. Installed on new ladders will double their life, prevent accidents, speed up work. Because of the adjustable feature you keep the rungs, tenons and side rails tight at all times. Should they work loose from wear, tighten adjusting nuts and ladder is like new.

Trojan Step Ladders

First choice of painters! Made of selected lumber. Has a drive brace at every angle of stile and steps and a lug iron at top of stile to prevent splitting. Every step is reinforced with a steel rod at the ends of which are large octagon washers which cover the nails that secure the steps. These washers prevent the nails from coming out and hold the steps firmly in mortises. Every ladder is bonded and insured.

Painters' Extension Ladders

With Rods, Braces and Shoes

In Two and Three Sections. Designed to meet all general requirements. The sides are 1 $\frac{1}{2}$ by 2 $\frac{3}{4}$ inches, vertical grain fir or hemlock. The longer lengths are heavier according to the strain they will receive. The rungs are clear hickory, 1 $\frac{1}{2}$ inches in diameter with a $\frac{7}{8}$ by 1 inch tenon let into the side and secured with a long wire. The locks are a reversible malleable type set on the inside for greater convenience. Guide iron is double roller type, depressed between rollers to eliminate difficulty in mounting or descending.

Paragon Sprayer No. 3

Capacity 12 Gals.

High working pressure is easy to maintain. No clogging, no straining of the solution; saves in both labor and material. The best sprayer for spraying such material as Luminall casein paint, Muralo cement paint, interior or exterior cold water paints, whitewash, etc.

It handles any job requiring 12 gallons or less at one loading and it is easily and quickly refilled. Change from one solution to another by simply rinsing the container with clean water and flushing pipes and hose and nozzle with a few strokes at the pump handle.

This sprayer owes its popularity to its simplicity of construction and ease of operation together with extraordinary power at the nozzle. It is easily moved about and handles readily in narrow paths, sharp turns, etc.

Standard Equipment, 10 feet special spray hose, 7 1/2 feet spray pipe in 3 sections; 1 steel spray nozzle; 1 brass mist spray nozzle.	List Each	Net Each

Wall Paper Remover

Solves the old paper removing problem by applying steam with special apparatus in a unique way. Steam is forced through any number of thicknesses of any kind of paper, no matter how difficult, quickly loosening it from the wall so that it will peel freely from the plaster. The machine is a light,

one-man portable outfit and requires very little attention and is always ready for service. Equipped with 20 feet of hose and two concentrators, one for large surfaces and the other for narrow spaces between door and window casings. One man will do a job in less time than three men could by the old method. Quickly saves its cost and pleases your customers with its speed and clean work. Any workman can learn to operate it speedily and efficiently in an hour or two. Requires 14x25 inches floor space. Height overall 28 inches. Weighs 58 pounds.

IT'S THE NEW

KERO ECTRIC WALL PAPER REMOVER

KEROSENE BURNING WALL PAPER REMOVER

WITH THE POT TYPE BURNER

Operates on kerosene. Lights instantly without generating.

No pumping—no pressure on the fuel tank. Has no generating tube or coil or other parts to plug.

The "KeroLectric" burner is not like anything

heretofore used. It is a new type developed by us, and the fuel is burned on a principal differing entirely from the usual methods.

The "KeroLectric" is furnished with two concentrators, one 13x16½ inches and the other 3¼x20 inches, twenty feet of special steam hose, and twenty-five feet of rubber insulated electric cord—in fact, it is complete and ready for operation upon filling with kerosene and water.

Made to Order Window Shades

Eagle "Hand-Made" Window Shades

The base fabric of EAGLE SHADES requires no chalk or clay filling and thus remains free from disfiguring cracks and pinholes. The processes used in the manufacture are identical with those used in the making of LUXOR—gelatin sizing and pure linseed oil colors are worked into the fabric by hand thus protecting it from sun and moisture and insuring a smooth, uniform finish. EAGLE SHADES afford the user, at a reasonable price, all of the many advantages that are characteristic of hand made shades.

Duplex Combinations available on 18" and 36" Shades—15% Additional

NOTE: The prices shown for CLINTON — EAGLE — WINDSOR HOLLANDS, and NEW YORK HOLLANDS are based on completed made-to-order measurements, which include ring pull, eyelet and brackets.

Windsor Stripe Holland Shades

WINDSOR STRIPED HOLLANDS afford the opportunity of securing in a low priced shade, the handsome and permanent corded effect usually associated with much more expensive materials. The stripes are woven into the fabric and run straight. The finish is clear and even. A very effective looking shade at any window.
